Dear Hiring Manager,

I am applying for Senior AI Engineer, Automation Engineer and Technology Enablement Lead opportunities in Switzerland. As a Technology Enablement Lead at Bayer Crop Science, I lead the development of AI, machine learning and automation solutions supporting corn and soybean R&D pipelines.

I coordinate cross-functional technical initiatives involving Python, BigQuery, Azure, Power Platform, Machine Learning and enterprise automation. In previous roles, I delivered the automation of more than 85% of manual processes and audit systems that reduced operational errors by up to 90%.

I am currently based in Brazil and am seeking an opportunity to relocate to Switzerland. I am available for remote interviews and prepared to support the work-permit process with all required documentation.

I would welcome the opportunity to discuss how my applied AI, data-platform and technical-leadership experience could help address the challenges of your organization.

Sincerely,
Danillo Xavier
