PROFILE

Technology leader and AI & Automation Engineer with 10+ years of experience building enterprise software, ML solutions and intelligent automation for complex operational environments.

Currently Technology Enablement Lead at Bayer Crop Science, leading digital solutions for corn and soybean R&D pipelines. Experienced in Python, ML, cloud, data platforms and RPA, with a track record of delivering multi-million-BRL operational impact.

IMPACT HIGHLIGHTS

- Saved BRL 850K/year in pesticide costs through process auditing tools.
- Reduced BRL 1.2M/year in labor through operational auditing and efficiency gains.
- Negotiated BRL 800K/year in contract savings and saved BRL 240K/year by reducing outsourcing needs in ERP modules.
- Reduced BRL 1.8M/month in fast-moving inventory costs and BRL 150K/month in obsolete or slow-moving inventory.
- Avoided BRL 500K/month in unnecessary requests with statistical and AI-driven auditing, plus BRL 400K/year in fuel savings.
- Reduced 90% of spraying and product-use issues and cut BRL 780K/year in absenteeism-related costs.
